High Proficiency Comes with Low Cost

Why JM-ORIGIN ?

JM-ORIGIN Technosoft provides high performance and cost effective IT Business Solutions and Consulting services using global delivery center in NAGERCOIL, Tamilnadu, India. JM-ORIGIN Technosoft has extensive expertise in Supply Chain Execution (SCE) and we have delivered solutions for 3PL, Hi-Technology, Retail, Automotive, Chemical, Pipeline, Food and Pharmaceutical.

With JMO Chirix Suite, You will be able to Optimize your business operations. Collaborate with partners, customers, suppliers. Transform your business into a competitive weapon. JMO helps companies respond faster and smarter to ever-changing market conditions and transition to a responsive supply network. JMO Chirix solutions are designed to help power the core business processes of planning, producing, and delivering across a supply network, resulting in higher customer satisfaction and lower inventory and capital tie-up.

Chirix Cloud ERP

Chirix Cloud ERP is the perfect solution for all your enterprise needs, because it takes the Complete Power of traditional ERP and places it on the cloud. This Cloud solution can be run on the Internet. Also, you do not need to buy a new hardware, training, or additional IT staff to use the Chirix System. In spite of its powerful functionalities, it is thus simple to deploy and run that you can go live in just 7 days.

Chirix ERP is completely modular; you can select the functions you need, to achieve the perfect fit for your business. Because you pay only for what you use, on a subscription basis, you can save money and observe your business changes, you can size up or size down as per your requirements. Also, upgrades and updates will no longer be difficult to obtain, for we will take care of all such needs, on your requirement.

Chirix Cloud ERP - The Modern Business Solution

The limitations faced with conventional ERP packages are now being successfully allayed with a powerful evolved technology. Here, is the table that explains how a Chirix ERP scores over the conventional ERP.

Conventional ERP	Chirix ERP
<i>Huge Capital Expenditure</i>	<i>No capital expenditure</i>
<i>Direct & indirect investments required</i>	<i>No investments required</i>
<i>Ever Increasing costs</i>	<i>Low-cost subscription model</i>
<i>Implementation takes place for months.</i>	<i>Implementable in weeks</i>
<i>Inflexible and rigid</i>	<i>Flexible and Scalable</i>
<i>Limited area access</i>	<i>Anytime, any where access from mobile devices</i>
<i>Upgrades at extra cost</i>	<i>Free upgrades provided</i>
<i>Limited licensing</i>	<i>Flexible licensing</i>

Features of Chirix ERP

Inventory Management

The high level of integration found within Chirix ERP system provides end-users with the highest level of visibility into stock transactions within the enterprise, and assures the accuracy of the data relating to the inventory within the stores. Chirix ERP gives you real time information on current stock levels and values, raw materials, work in progress and finished goods. With the stock transfer it is easy to track the changing stock levels in all the stores. Stock of the customers can be easily track with the customer name maintained in the stock.

Purchase Management

The Chirix ERP Purchasing Software Module provides complete purchasing control to generate and track purchase orders from Purchase requests to Purchase Invoices. Purchase Orders can be generated with the help of previous supplier item prices used by the system to recommend supplier selection for each purchase order. Requisitions can be generated also by the users in production. Once approved, requisitions can be converted to Purchase Orders.

Order & Distribution Management

Distribution Management Suite allows you to manage sales orders, track inventory, fill orders, improve purchasing, and provide customer support from anywhere. The Distribution Management Suite is integrated with all other JMO Chirix suites and can be deployed on-premises or hosted at a datacenter so you can control where sensitive data is stored.

Financial Management

Chirix ERP's financial accounting provides company-wide integration that is essential to strategic decision making. The financial accounting module in Chirix ERP gives you the ability to centrally track financial accounting data within a single framework, of multiple organizations, multiple branches and chart of accounts.

Human Resource Management

Chirix ERP maintain Records of employees, IN/OUT data updating, Processing the salary, statutory payments like PF, ESI and TDS deductions and Payments. In large organizations, where payroll processing time is a bottleneck, can be easily processed.

Production Management

Production management software begins with a real-time system that analyzes customer forecasts and releases, planned procurement, current inventory, and planned production. Then recommends and lets you easily execute production schedules and material purchase orders. Chirix ERP is used to Trace out the work orders process and its adjacent machine, Maintained staff advances, Captures detailed labor and work order tracking information, Is fully integrated with the equipment maintenance system, Work order process schedule can be maintained, Service wise salary provided.

Business benefits delivered by Chirix ERP

Low Cost Model

No Capital Expenditure

Chirix ERP is made available on the Internet, on a subscription model, and requires no additional licenses. This ensures that there is no CAPEX required to purchase the solution outright.

No Additional Investments

Because Chirix ERP is hosted on the cloud, you need not invest in new IT infrastructure such as hardware, middleware, networks, and so on.

No Expenses on IT Staffing

Chirix ERP is operated on the Internet and is wholly managed by Jm-Origin. This eliminates the need for exclusive IT staffing in your office to take care of the solution.

No Licensing Issues

Jm-Origin's delivery model does not require you to buy any licenses to use the product. Therefore, you pay only when you use the application and also only for the number of users.

No Maintenance Costs

Chirix ERP's maintenance is entirely managed by Jm-Origin, free of cost. To enhance your operational performance, the solution will also be automatically updated from time to time with the latest technology versions.

Expandability

Pay-per-use

Most enterprises do not need 80% of the functionality offered by conventional ERPs. Chirix ERP offers you just the "right" functionality for your Business; therefore, you pay only for what you use depending on your current business requirements.

Scale as you grow

Jm-Origin's scale-up model ensures that you "subscribe" only to those functionalities that your business absolutely requires, at a specific point in time. This allows you to increase or decrease the number of users and quickly adapt to market dynamics.

Free Upgrades

To keep pace with growing customer requirements, Jm-Origin carries out research and development to understand industry requirements and upgrade the solution accordingly on a regular basis.

Agility

Go Live within few weeks

Chirix ERP follows a milestone-based deployment, which mandatorily involves various stages such as registration, environment setup, role verification, user training, master data collection, opening balance upload and go live. This methodical implementation reduces deployment time radically.

No Additional Infrastructure required

With Chirix ERP, you do not have to burden yourself with the installation of underlining Infrastructure nor about code modification and extensions to the core software. This guarantees that you can go live in a very less time.

Paper & Manual Practices

Paperless Workflow Automation

Chirix ERP

Better Management

Supports Regulatory Compliance

With Chirix ERP, your business is empowered with accelerated financial closures, more accurate financial reporting, and superior cash management. The solution supports international and local accounting standards and also eliminates the risk of non-compliance.

Enables Delegation and Improves Control

Different levels of user and action level controls will help you standardize processes among departments and bring in visibility across all functions.

Enhanced Productivity and Efficiency

With Chirix ERP, you can gain a deeper insight into organizational performance, by analyzing revenue and cost information for customers, products, projects, and services. It gives you options to estimate material and process costs for any product, before quoting for the same. You can also work on multiple finance books using a single transaction login and screen, to enhance efficiency at work.

Cost Optimization

You can centralize all processes and take greater control of cross-company payment processes. Centralization and decentralization can be handled with ease, without having to log on to different systems. These capabilities help reduce your banking fees and optimize working capital and liquidity, by accurately forecasting your cash flow and cash requirements.

24x7 Supports

A highly efficient, effective and instant support of end-users in 24x7 services is provided by Jm-Origin.

Ease accessibility

Chirix ERP comes with easy-to-access user interfaces for ease of operation. Intuitive web-like features, online tutorials, and actionable alerts and prompts for transactions, help you at every stage of each transaction and accelerate ease of adoption.

Convenient Screens

E-mail Alerts

The solution provides several options using which you can generate alerts on important and stalled events and thus make quick decisions on processes.

Anywhere Access

Chirix ERP gives you the freedom to access information from any part of the globe at the click of a browser button in your mobile device or available systems. Geographically separated teams can therefore function better with improved information availability.

Business Benefits

- Reliable stock availability and faster stock rotation
- Improved supply chain performance and delivery accuracy
- Fast, accurate cost estimating and secure pricing
- Improved productivity and resource utilization
- Rapid and effective response to change
- Better management of business growth and product complexity
- Greater administrative efficiency
