

Ajanta

Celebration Guranteed...

Success Story

“Ajanta needed to stop the stoppage on manufacturing to full fill customer satisfaction. Because, they couldn’t find out accurate stock requirements for production at physically and failed to trace each manufacturing process. They had chosen an ERP system called Matrix, which support them to keep track of everything, that is Life Cycle of Stocks as well as Accounts.”

Company Overview

For over 40 years, Ajanta Fireworks industries, Sivakasi are pleased to introduce themselves as one of the leading manufacturer of fireworks in India. Ajanta Fireworks varieties includes Sparklers, Crackers, Chakkars, Flower Pots, Rockets, Aerial Novelties and Gift Boxes.

They manufacturers of superior quality "AJANTA", HANUMAN", "GLOBE" brand fireworks and supply products through all over India. Also Jeyaram Fireworks, Ajanta Papaer Caps, which are the production plants of Ajnata and Manufature Specialist in Ground chakkras, Chorsa vedi.

After the extensive research, Ajanata Fireworks Implemented Matrix ERP with JM-Origin Technosoft cloud based ERP Solution to face their intention, that improves inventory management capabilities with the ability to measure real time insights and visibility of Inventory, Production and Sales data to control over top to bottom action on production units.

Inventory Control*

" No stocks can get out of my sights, monitering stocks lifecycle in every stage of production become noticeable for us ".

Production -

" My Production lacking issue due to of the material shoratge had been resolved by the Production Requirement Report ".

- Mr. Manikandan, Managing Director

Purchase Management

Reorder Level:-

The automatic suggestion of Purchase Order at the appropriate time by comparison of stock level against reorder level on Matrix ERP, which was determined by Economic Order Quantity (EOQ) concept; By this ROL Ajanta improves in Inventory Level Forecasting and cut over the redundant purchasing cost.

Production Management

Multi Plant Support:-

In recent year, the tradition of coordination of multi plant production surroundings is common in many industry. On this way, Our Ajanta needed to track and gather the accurate insights details of production process on its sub concern Jeyaram Firworks. The Production Plants allow Ajanta firworks to enjoy with below given benefits,

Benefits:

- 1.Streamline inter-plant stock transfer
- 2.Multi-facility planning & manufacture capacity
- 3.Reduce IT-cost, centralized single database
- 4.Cutback the repetitious activity across sites

Bill of Materials:-

By the automatic assemble of rawmaterials from products, and updating the inventory accordingly, when generating Work Order, Ajanta reduce the time consuming, find out stock requirement accurately on production..

Production Requirement:-

With Matrix ERP's "Production Requirement Report", Ajanta Fireworks able to take required stocks details for upcoming productions along with one step ahead included details such as On Hand, Allocated & Shortage stocks quantity. The shortage details of raw materials is identified at in the very early stage. This will gear the Production Process and support them to avoid the stall in the production

WO Payments:-

WO payment feature on Matrix ERP help Ajanta to release the exact production based wages to resources, & there is no more missing, extra wages problem. Ajanta enjoy on tracking resource activity deeply with "Staff Productivity, Process Receipts" and more reports.

Distribution Management

Order Schedule:-

Among the order scheduling feature, Ajanta can schedule their dispatches. The Matrix ERP's Finance Management "Account Receivable by Customer" report helps them to make a right decision at right time on Dispatching Period.

"With just one click, I can get Purchase to Financial details with printable feature. JMO provided solution that fit my unique needs".
